The Assault X RC road bike is equipped with the 135mm of travel and 100mm head-on 29er wheelsset, designed to take your weight and terrain and punch it over the top. These light, highly-adjustable frame and fork parts are designed to increase the range of travel, which is ultimately how Cannondale decides to build their bikes. If you are new to the bike game, you will find out how valuable this technology is when applying it to your favorite trails, and if you have a long history in the bike game, we hope you are enjoying this new spring-loaded assault platform. The Cannondale Assault X RC is part of a range of bikes that includes the Assault 1 and 2, the Turbo Range and the Endura and Road Series. These bikes all have similar dimensions, however the Cannondale's geometry has gone through a thorough and expert review that is more than just a matter of intuition and muscle memory. The Assault X RC is rated as a 26-inch bike, however it has a 5mm-longer chainstays (103mm), resulting in more stable and longer wheelbase geometry. The 26-inch wheels matched with a 105mm headtube offer
